Section 8

**Exposure Control / Personal Protection**

Engineering Controls: Observe occupational exposure limits and minimize the risk of inhalation of vapors and mist. Provide adequate ventilation.  
Respiratory Protection: In case of inadequate ventilation or when the product is heated, use suitable respiratory equipment with gas filter (type A2). If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. In the USA, if respirators are used, a program should be instituted to assure compliance with OSHA Standard 63 FR 1152, January 8, 1998. Respirator type: Use NIOSH-approved respirator (See 29 CFR 1910.134, respiratory protection standard).  
Eye Protection: If contact is likely, safety glasses with side shields are recommended. Risk of contact: wear approved safety goggles.  
Hand Protection: Wear protective gloves  
Skin Protection: Use skin protection  
Hygiene Measures: Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking or smoking. Routinely wash work clothing and protective equipment to remove contaminants.  
Environmental Exposure Controls: Environmental Manager must be informed of all major spillages.
